

White Label Software SARJ Plus

2022

SARJ Plus

is a manufacturer of EV Charging Stations and developer of charging management software and mobile application. Our company offers an advanced IT solution for managing charging stations in different locations and a full cycle system for commercial use of charging stations.

White Label Software Solution

Functionality

Charge Point Operator (CPO) functionality – Admin Panel

Manage EV charging stations, transactions, and users from a single interface with ease and efficiency. Monitor your entire charging network conveniently via a web browser.

Functionality for clients – Mobile App/Web-site

We develop and customize the Mobile App according to your corporate style for management of each station ports, cashless billing, detailed statistics for convenient charging of you clients.

White Label Software

Manage your EV charging network with our White Label turnkey solution on a ready-made platform that you can configure and use right now.

YOUR LOGO

Your logo will be displayed in the mobile application or website.

YOUR COLORS

You can customize the main and background colors of menus, buttons, pins and main elements in the Mobile App or website.

ICONS

You can choose your individual icons, their colors etc.

White Label Software Benefits

- ✓ Saves you time and money. No need to pay your own developers to develop and maintain a software package
- ✓ Simplifies and reduces time to enter market and reduces the risk of failure.
- ✓ Service deployment and training can be completed in 4-8 weeks
- ✓ Convenient station management
- ✓ “Guest mode” EV charging
- ✓ Plug&Charge function support
- ✓ Multi-language support
- ✓ Experience of managing EV Charging Stations networks

Functionality of Administration Panel

STATION MANAGEMENT

- Remote monitoring (all data on active charging sessions, stations or individual ports).
- Searching, adding and flexible station management according to OCPP 1.6.
- Start and stop sessions by administrator, the ability to start the session on behalf of the client.

TARIFF MANAGEMENT

Add the tariff per kWh, by time, add static or dynamic tariffs to entire stations or individual ports. (Certain days, night hours, discounts for customers, etc.)

CLIENT MANAGEMENT

Convenient database of registered customers.

PAYMENT MANAGEMENT

Convenient way to receive and view payments for charging sessions and reservations.

HISTORY AND REPORTS

See transaction histories for each station or general reports. Convenient export of monthly reports or for the selected period in .xls format

STATISTICS

Full displaying of statistics of your charging sessions in graphs (total consumption, time, cost)

Functionality for clients – Mobile App/Web-site

Clients can sign in your personal account both via the application and the website

Visa/MasterCard/ApplePay/GooglePay for paying of sessions

statistics and history for all charging sessions

receiving messages about charging

multi-sessions for charging other customers

searching for stations on the map

making routes to the selected station

carrying out a charging session

possibility to reserve a station

Functionality for clients – Mobile App/Web-site

CHARGING PROCESS

“Guest” mode of charging for clients

GUEST MODE

The client can charge without downloading the application and registration.

- The client scans the QR-code on the station or finds the station on the web-site /mobile application,

- Inputs the required number of kWh

- Pays (you need to enter your bank card details or using ApplePay / GooglePay)

- Charging

* If charging is not complete, the rest is returned to the bank card.
